

Your project is entering the pre-maturation stage

The objective of SATT Nord is to promote the results of academic research. It is a tool for French researchers to detect and develop the results of work undertaken in public laboratories and that has great potential for businesses.

Our support....

Our support is considered the SATT Nord investment and is not charged to the university or the laboratory

...Your involvement

- >>> Reviewing the science: editing the invention declaration, participating in technical and economic studies...
- >>> Validating the transfer strategy and developing the maturation schedule with an expert in the field.
- >>> Support from the investment committee.
